

Overview

The PSAM14 Electronic Proceedings include:

- Forward and acknowledgements
- Committees List
- A “Meeting at a Glance” table with links to each session and associated manuscript.
- A complete Authors’ Index
- Sponsors and Exhibitors, and
- PSAM14 printable program book

Search

The papers in the proceedings are all indexed and search ready.

The search process windows on PDF differ with AdobePDF versions as well as with the platforms you may be working with.

One process which should work on all platforms and with all versions is to locate the index file named **Proceedings_Search.pdf**. An alias to this file can be found in the main directory along with the start (main) file named PSAM14.pdf. The file itself is located in the **Content Directory**.

A window looking like the image on the right will open and display the fact that you have selected to search the indexed papers.

The submitted manuscripts are the only indexed items. The program book and other pages in this collection have not been indexed.

p.s. When you download the zipped file you **may** get the message “Security Warning....The operation you are trying to perform potentially requires read access to your drives. Do you want to allow this operation?” If you get this message you must click “Allow”.
